

Release notes - UDI EUDAMED Add-On - EU V2023/11

Bug

[UEA-741](#) Subtables can't be shown in /UDI/Attributes

Description

When a user clicks on the sub tables such as "Clinical Size types" in the /UDI/ATTRIBUTES or /UDI/UPLOAD T-Code, the system will throw an error message.

[UEA-743](#) Data Integrity Issues

Description

1. Data Integrity check does not take over the marked values for the data area "FDA Add-On".
2. Data Integrity checks even locked values pressing "Select All" button. But does not save the data.

Environment

Effected UDI T-Codes: /UDI/MAINTAIN and /UDI/INTEGRITY_MASS

[UEA-745](#) EU Country Code changes

Description

Country Code change for "United Kingdom (Northern Ireland only)" and for Greece in /UDI/CL_026.

Old value "UK" replaced by "XI"

Old value "GR" replaced by "EL"

Environment

T-Code: /UDI/CL_026

[UEA-750](#) Upload of unlinked UDI-DI creates duplicate entries in database

Description

When a unlinked UDI-DI is getting uploaded using Excel Upload function with another Basic UDI-DI, the UDI-DI data are created again with different intern ID (GUID).

This can cause an unexpected program behavior.

Environment

T-Code

Story

[UEA-751](#) RFC Function module will surf as API for other applications

Description

Two RFC FM's developed to get:

1. Select all relevant UDI data for FDA and/or EUDAMED
2. Select all udi data for EUDAMED and/or FDA

Task

[UEA-744](#) Authorization S_TABU_NAM added

Description

Additional SAP standard table authorization (S_TABU_NAM) added for following T-Codes:

- /UDI/CL031 - Application settings
- /UDI/CL027 - SRN Number

UEA-749 Not Eudamed relevant UDI-DI's still visible in /UDI/MAINTAIN

Description

When an existing UDI-DI record was marked in MM02 as EUDAMED relevant = "no" or "undefined" it was still visible in

UEA-752 Updating EUDAMED Version numbering

Description

According to EUDAMED since the XML Version updated to 2.0.10 (before 2.0.8) and EUDAMED Release Notes 2.12. of September 2023, the Version of the UDI data inside the XML (Update of Basic UDI-DI, Update of Market Information, Update of Container Package) has been changed.

Before the Version number is incremented after the UDI Submission and new - it is updated before submission.

Default is now not to decrement the version number anymore. But new application setting entry added which can force to decrement of the version number. This is done for compatibility reasons.
