1. Updates in V2021/06

1.1 Transports

Transport	Description	Type	Release Date	Development
ECCCK900667	EITC: UDI FDA Add-On 2021/06	Workbench	15.06.2021	SAP01 - ECC6.0 NW 7.01

1.2 Change Log

1.2.1 Error validation check

An error validation check was added which examines if the first three fields are maintained:

- Package DI number
- Quantity per package
- Contains DI package

Further it checks if the "Commercial Distribution End Date" for the base package is entered and if this date is after or on the same date as the "Package Discontinue Date".

JIRA	Type	Involved transactions
UFA-63	Feature	/UDI/US_UDI_DATA

1.2.2 DUNS filter in standard

For customers with multiple DUNS numbers in the company an user defined DUNS filter was added with the following features:

- An validation check for the DUNS numbers to verify if the entry is numeric
- The new parameter name for DUNS is /UDI/DUNS

With these features the DUNS filter can be used with the other UDI FDA functions, such as the "UDI Master Data List View - /UDI/US_UDI_VIEW", which shows the DUNS numbers in a list and which then can be filtered according to the customer needs.

JIRA	Type	Involved transactions
UFA-52	Feature	Various transaction's

1.2.3 DUMP in validation check

When user performed "/UDI/US_UDI_DATA" and clicked on the buttons "Data Integrity" and "Check UDI data", a dump occurred while the object was not initialized accordingly. This dump was corrected.

JIRA	Type	Involved transactions
UFA-67	Bug	/UDI/US_UDI_DATA
