

Release notes - UDI FDA Add-On - FDA V2022/12

Bug

[UFA-77](#) Grammar error in english Text / Progress bar missing

Description

Progress bar while executing Status Update T-code is missing

Environment

Effected T-Code:

[UFA-81](#) UDI Data can be uploaded even the Material is not UDI relevant

Description

UDI data cannot be uploaded anymore using Excel upload.

The status has to be at least "Preparation" or "Udi relevant"

Task

[UFA-79](#) Refresh Button added in UDI Attributes

Description

Refresh button added to T-Code /UDI/US_UDI_VIEW. This enables the user to reload the displayed data without leaving the recent screen.

[UFA-83](#) New Application Parameter

Description

New application parameter setting is activating the automatic validation check after start of T-Code for /UDI/US_DATA_VIEW.

Setting in Application parameter:

Group Parameter name Value

APPLICATION_BASIC EXEC_VALIDATE /UDI/US_UDI_VIEW

[UFA-86](#) Request: Force Upload Button instead of Option in SelScreen

Description

The option in /UDI/UPLOAD to upload records with errors is moved to the upload screen. There you have now two buttons to save record without errors and records with errors.

Records with serious errors which is displayed with an red arrow icon, can't still saved.
